

Greencorner Pole Replacement Instructions

Contents Included:

- 1 – Replacement Greencorner Umbrella Pole**
- 3 – Pole Screws**

To replace the pole, you will need to remove your canopy. Please refer to the instructions provided, or visit greencorner.com/support

1. Remove canopy and set aside.
2. Remove all hex bolts from the top hub to reveal the screws holding the top hub to the pole.
3. Remove the three screws. They will look different than the screws holding the U-brackets in place.
4. Tap the top hub off from the bottom with a rubber mallet or other soft device. Hit in a circular pattern to make this easier and to avoid breaking the hub.
5. Slide the broken pole out.
6. Slide the new pole in and align double pulley with the single pulley so that they are in a straight line.
7. Place the hub on the new pole. Align the U-brackets with the sliding hub.
8. Repeat steps 1 through 3 in reverse.
9. Enjoy your repaired Greencorner umbrella!

If you have any questions, or if you need additional components, please do not hesitate to contact Greencorner customer support!
