

## Base Wheel Assembly Instructions

### Contents:

- 4 - Fixed stem casters with swivel and brake lock
- 4 - Jam nuts
- 1 - Tube medium-strength Loctite
- 1 - Completed Base (See separate assembly instructions.)

### B-Series Instructions:

1. Lay down a towel or similar soft material to prevent damaging the powder coating. **Note:** Be mindful of the weight of the base plate and get as much help as necessary to avoid personal injury.
2. Insert the thread stem through the corner holes of the base plate.
3. Apply Loctite to the protruding threaded portion of the stem and to the inside threads of the jam nuts. This will prevent the nuts from inadvertently coming loose.

### SC-Series Instructions:

1. Tighten the thread stems into the bottom of the base plate using a ~15mm wrench.
