

## Umbrella Protective Storage Cover Assembly

*This protective storage cover includes a collapsible pole to eliminate the need for a ladder.*

### Follow the instructions below for assembly:

1. Lay out the protective storage cover on a clean long table for ease of assembly.
2. Unzip the cover and separate the two sides of the zipper completely to find the side with the sleeve (pictured below).

3. Un-collapse the pole and insert it all the way into the sleeve.
4. With the umbrella fully closed, use the pole in the cover to guide the protective cover up and over the top of the umbrella.
5. Pull the zipper on the storage cover completely closed slowly to ensure that the canopy fabric does not get caught. You may need to lightly press the canopy inward away from the zipper to be completely safe.
6. **Do not** remove the collapsible pole as this may damage your umbrella or cover. The pole is supposed to stay in the cover for as long as the cover is in use.

### To remove the cover from an umbrella:

1. Fully unzip the zipper on the storage cover, ensuring the fabric of the canopy does not get caught.
2. Use the pole in the cover to lift the cover off of the umbrella.
3. You can remove the pole from the cover now, collapse it and fold the cover for storage.
